Customer Collaborative Meeting September, 2005

- Based on a review of actual results through July 31, 2005, the FCRPS Modified Net Revenue (MNR) actuals to date remain on course with the 3rd Quarter Forecast. Agency MNR actuals to date are \$87.9 million.
- Power Business Line MNR totaling \$106.2 million through July 31, 2005, are tracking with the forecast presented in the 3rd Quarter Review.
 - Current projections of net surplus sales prices indicate improvements over SOY projections. Although improved, net secondary revenues are volatile and dependent upon water supply, market prices, and hydro operations. Current total operating revenues are \$2,228.4 million.
 - Our results this month are not inconsistent with what we expected at the time of the 3rd Quarter Review. Current expenses (operating expenses and net interest expense) total \$2,021.7 million.

- Transmission Business Line net revenue/expense through July 31, 2005, are consistent with the 3rd Quarter Review forecast. Current actuals to date indicate net expense of \$19.3 million.
 - TBL revenues of \$524.2 million through July 31, 2005 are tracking with the total revenue forecast in the 3rd Quarter Review.
 - TBL actual expenses through July 31, 2005 are tracking with the forecast presented in the 3rd Quarter Review. Current expenses (operating expenses and net interest expense) total \$543.5 million.

- FCRPS Statement of Revenue and Expenses
- PBL Statement of Revenue and Expenses
- PBL/BPA Statement of Modified Net Revenue
- TBL Statement of Revenue and Expenses
- Corporate Statement of Revenue and Expenses

Federal Columbia River Power System

<1 For BPA management reports, Gross Sales and Purchase Power are shown separated from the power bookout adjustment (EITF 03-11, effective as of Oct 1, 2003) to provide a better picture of our gross sales and gross purchase power. <2 This is an "accounting only" (no cash impact) adjustment representing the mark-to-market (MTM) adjustment required by SFAS 133, as amended, for identified derivative instruments

Report ID: CC_0020

<6 The consolidated FCRPS Statement reduces reported Revenues and Expenses where between business line transactions occur, the most significant of which are for Transmission Acquisition and Ancillary Services

Data Source: EPM Data Warehouse

Run Date: August 15,2005

The MTM adjustment is excluded in calculating Modified Net Revenues for rate setting purposes.

<3 The Start-of-Year (SOY) budget reflects the power rates decisions made in September 2004 for FY05 and includes transmission data that is consistent with the data presented in the Programs-in-Review (PIR) process.</p>

<4 Although the forecasts in this report are presented as point estimates, BPA operates a hydro-based system that encounters much uncertainty regarding water supply and wholesale market prices

These uncertainties among other factors may result in large range swings +/- impacting the final results in revenues, expenses, and cash reserves.

<5 Beginning in FY 2004, consolidated actuals reflect the inclusion of transactions associated with a Variable Interest Entity (VIES), which is in accordance with the FASB Interpretation No. 46 (FIN 46) that is effective as of December, 2003. VIES information is not included in rate case, budget and forecast data.

- <1 Includes \$168,491k unrealized loss due to the Cumulative Effect of Change in Accounting Principle for SFAS 133, which was posted to FY 2001. This amount is excluded when calculating the MNR. Prior report releases and presentations reported the net effect of this change, resulting in previously reported amounts of \$(212,043.18)k for PBL. Net Revenue (Expense), and \$(205,730.03) for PBL MNR Adjustment.
- <2 Revenue Adjustments reflect impacts from SFAS 133 that are subtracted from net revenue, while EN Debt Service adjustments reduce MNR if rate case amounts exceed actual EN Debt Services expenses.
- <3 Consistent with the GRSP's, the Modified Net Revenue (MNR) is an adjustment to Net Revenues for the purpose of calculating the rate case Financial and Safety-net Cost Recovery Adjustment Clause. The MNR excludes the impact of SFAS 133 transactions (Accounting for Denvistive Instruments and Hedging Activities), for Debt Service, the MNR excludes actual EN debt service and substitutes the Energy Northwest debt service expenses as forecasted in the WP-02 Final Studies.</p>
- <4 FYTD PBL MNR equals \$106 million and FYTD FCRPS MNR equals \$88 million

Report ID: CC 0022

Requesting BL: CORPT

Unit of measure: \$ Thousands

- <5 The GRSP's definition of the Accumulated Net Revenue (ANR) differs from the accounting standard definition of ANR. The GRSP's defined ANR is used in determining the FB CRAC rates; the GRSP's ANR represents the accounting standard Accumulated Net Revenue (starting 09/30/99) less the accumulated effects of FAS 133 and EN debt refinancing activities (see note 1.)
- <6 In accordance with the GRSP's, the FB CRAC thresholds were established to provide an upward adjustment to rates to address declining financial circumstances. The thresholds are established as a benchmark in which to evaluate the financial condition. The FB CRAC thresholds for the ends of FY 2003 - 2005 are reset to equal the SN CRAC thresholds each time the SN CRAC thresholds are recalculated. ISN-03-A-021
- <7 Although the forecasts in this report are presented as point estimates, BPA operates a hydro-based system that encounters much uncertainty regarding water supply and wholesale market prices. This report is not an absolute prediction of future revenues or costs, nor does it reflect the actual ANR for the end of the fiscal year, (unless otherwise indicated.) This report should not be used for investment purposes, nor is it a quarantee that the actual ANR will be achieved as forecasted.</p>
- <8 Because the FCRPS MNR excludes actual EN debt service amounts and substitutes the Energy Northwest debt service expenses as forecasted in the WP-02 Final Studies, the FCRPS MNR removes the effect of debt refinancing from BPA's annual financial activities.
- < 9 The Start-of-Year (SOY) budget reflects the power rates decisions made in September 2004 for FY05 and includes transmission data that is consistent with the data presented in the Programs-in-Review (PIR) process

<1 The TBL groupings of expenses by programs and sub-programs for FY 2005 estimates, developed as part of the 2005 Rate Case, are reconstituted to match the programs and sub-programs groupings shown on this report.

<4 Beginning in FY 2004, consolidated actuals reflect the inclusion of transactions associated with a Variable Interest Entity (VIES), which is in accordance with the FASB Interpretation No. 46 (FIN 46) that is effective as of December, 2003. VIES information is not included in rate case, budget and forecast data.

<2 The Start-of-Year (SOY) budget for FY 2005 is consistent with the data presented in the Programs-in-Review (PIR) process.

<3 Although the forecasts in this report are presented as point estimates. BPA operates a hydro-based system that encounters much uncertainty regarding water supply</p> and wholesale market prices. These uncertainties, among other factors, may result in large range swings +/- impacting the final results in revenues, expenses, and cash reserves.
